## I design products to solve real problems.

### About me

Hi, 🙋 I'm Nasimul, a self taught Product Designer (UI/UX) with expertise in a broad range of areas, including design systems, prototype, auto layout, ux research and ux audits, problem-solving, ui design, design accessibility and applying usability heuristics. I am proficient in industry-standard software Figma and can work in Adobe Creative Suite (Photoshop, Illustrator, and Premiere Pro), Notion, Slack, Discord, Balsamiq, and Miro, allowing me to seamlessly integrate into your existing workflow.

### My Hobby

### Learning and Expanding Knowledge

My hobby is to expand my knowledge through user interface studies, case studies, research initiatives, UX podcasts, tutorials, and reading industry publications. Product design is not just my profession; it is my true passion. I want to build successful and impactful products that will solve real problems and shape users lives in a better way.

# Places that I've worked at

## Product Designer

@TexBazar.xyz

📍 Dhanmondi, Dhaka.

2024-Present

### My experience

As the **Product Designer (UI/UX)** for TexBazar, I single-handedly designed the company's website and mobile app, ensuring a seamless and intuitive user experience. Now I continually improve designs to meet user needs and enhance satisfaction through user research and testing. I collaborate closely with cross-functional teams to align design with business objectives and technical feasibility, while maintaining a cohesive design system. My work has significantly increased user engagement and retention, contributing to TexBazar's success in the textile market.

## Lead UX Designer

@Supernova Techno Ltd.

📍 Mohakhali, Dhaka.

2023-2024

### My experience

I have worked as the **Lead UI/UX Designer** at Supernova Techno Ltd, a leading value-added services content provider in Bangladesh. I had the opportunity to design and enhance the user experience for the **Kabbik** App (the largest audiobook platform in Bangladesh). My best work is the design of an online medical service app called **Purno Health**. I single-handedly designed the company's website and mobile app. **Purno Health** is now revolutionizing healthcare access in Bangladesh and saving millions of life through digital healthcare solutions.

## UI/UX Designer

@Freelance Marketplace

📍 Work from home

2022-2023

### My experience

I have several experiences working in various freelance projects. I also worked with international and local clients. As a freelance UI Designer I delivered the best experience to my clients with 100% success rate. I have designed many fintech apps, landing pages, admin dashboards, and many more. I explored freelance work in graphic design, Photoshop, and video editing. My creative journey then led me to a new path as a **self-taught Product Designer**. Now, I put my energy into making user-friendly and beautiful digital interfaces, showing that my career is all about flexibility and a passion for doing great work.

# Can be Miscellaneous

## Education

2017 - 2021

**Bachelor of Arts (English)**

Daffodil International University

2014 - 2016

**Business Studies**

Cantonment Public School & College, Mymensingh
